## Projects

---

### aniBase

*Tech stack: React, Jikan API, Vite, localStorage*

Web application to keep track of the anime you watch or have watched

### portoflio

*Tech stack: NextJS, Tailwind, Shadcn-ui, Framer Motion*

Portfolio website created to learn new technologies and keep all my information in one place

### uncharted-waters-bot

*Tech stack: Node.js, Discord.js, Tesseract.js, Google Sheets API*

Discord bot for the Uncharted Waters event from a game called King's Choice. It was created to share information about the event and automatically update the Google Sheets spreadsheet. Photos uploaded to the Discord channel are pre-processed and text is extracted using Tesseract.js and then passed to the Google Sheets API to update cells, saving time compared to doing it manually.

### codeStats

*Tech stack: Preact, Emotion, Vite, Vitest*

A group project developed during the studies. It was created to generate and standardize reports from git repositories so teachers could easily see who contributed enough. I was mainly responsible for the front end of the application, connecting it to the Django backend. This was also the first time I used Docker during development and deployment, so I learned some basics.

## Education

---

### BEng, Computer Science

Adam Mickiewicz University

2019 – 2023

Poznań, Poland

## Profile

---

Computer Science graduate of UAM, Poznań. I'm looking forward to new opportunities related to frontend development, but I'm open to new experiences. I would also like to expand my knowledge towards backend development to become a full-stack developer.

## Skills

---

### Good knowledge:

Javascript, React.js, Rest APIs, HTML, CSS, styled-components/emotion, Git

### Basic knowledge:

Node.js, Express, Figma, Postman, Docker, Python

### Had first contact with:

PostgreSQL, Typescript, Tailwind, Next.js, Supabase

## Languages

---

### English

B2

### Polish

Native
